Portfolio

Final-year B.E. Computer Science and Engineering student (8.40 CGPA) at Sri Krishna Institute of Technology with strong foundations in Java, OOP, and DSA. Hands-on experience developing software applications through academic and personal projects in full-stack development, machine learning, and web technologies. Looking to apply programming and problem-solving skills to build effective software solutions while expanding technical expertise through new technologies.

TECHNICAL SKILLS

Languages	Java, Python, C, JavaScript (Basic), TypeScript (Basic)
Web & Backend	HTML, CSS, React (Basic), Node.js (Basic), Express.js (Basic), FastAPI, JSP, Servlets
Databases	SQL, MySQL, SQLite
CS Fundamentals	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
ML & Data Science	XGBoost, Scikit-learn, Pandas, NumPy, DeepFace
Tools, Cloud & DevOps	Git, GitHub, VS Code, Eclipse, Jupyter Notebook, AWS (Basic), DevOps (Basic)

PROJECTS

Classrix – AI-Powered Attendance Management System2026

React, TypeScript, Node.js, Express.js, FastAPI, DeepFace, XGBoost, SQLite

- Developed a full-stack attendance management system integrating facial recognition and machine learning analytics to automate classroom attendance and provide attendance insights.
- Built a React–Node.js–Python architecture with 69 REST API endpoints, a 14-table SQLite database, and role-based access control for administrators, teachers, and students.
- Integrated DeepFace-based facial recognition and four ML models for attendance trend, risk, consistency, and attentiveness analysis through a Python FastAPI service.

ShopNest – E-Commerce Website2024

Java, JSP, Servlets, JDBC, MySQL

- Developed an e-commerce web application with user authentication, dynamic product browsing, and session-based shopping cart management.
- Implemented role-based access control and parameterized database operations using HTTP sessions and JDBC PreparedStatement.

Diabetes Risk Prediction System2025

Python, XGBoost, PyQt5, Pandas, NumPy, Scikit-learn

- Developed a desktop machine learning application using XGBoost to predict diabetes risk from 8 clinical and demographic parameters across a 100,001-record dataset, achieving 96.80% accuracy with 0.80 F1-score on the diabetes class.
- Implemented an end-to-end ML pipeline with data preprocessing, SMOTE-based class balancing, model persistence, and real-time prediction through a PyQt5 interface.

EDUCATION

Sri Krishna Institute of Technology	2023 – Present (2027)
B.E. Computer Science and Engineering	CGPA: 8.40
Visvesvaraya Technological University (VTU), Karnataka	
Ashok Comp PU College	2021 – 2023
PCMC	92.50%
St. Claret High School	2020 – 2021
Secondary School Certificate (SSLC)	86.24%

TRAINING

Kodnest Technologies Pvt. Ltd.Jan 2024 – May 2024

Full Stack Java Trainee

- Trained in Java SE, Java EE, SQL, HTML, CSS, JavaScript, and basic Data Structures through hands-on exercises.

CERTIFICATIONS & ACHIEVEMENTS

Finalist — SAP Code Unnati Innovation Marathon	2025–26
Certified Full Stack Developer — Kodnest Technologies	May 2024
DSA with Java — Apna College	2024
Python for Data Science — NPTEL, IIT Madras	Aug 2024
Emerging Technologies — SAP Code Unnati Program, Edunet Foundation	2025–2026
Basics of AWS — Nano Stream Technologies	2025
